## Used Durma HAP 30120 hydraulic press brake folder

Stock No	4675
Control Unit type	Elgo Type 88P2
Length of Work Table	3050mm
Distance Between Columns	2550mm
Maximum Open Height	375mm
Ballscrew Backgauge Travel	650mm
Throat Depth	250mm
Nominal Pressure - Tonnage	120 tonnes
Number of machine Axis	2
Power requirements	3 phase 415 volt
Year of manufacture	1997
Overall dimensions	3.65m x 1.5m x 2.6m high
Weight	7.5 tonnes
<b>Accessories</b>	As per can be seen in the photos
<b>Sale Price</b>	\$15,000+GST
Faults - If Any	This machine is fitted with an ELGO 88P2 control system, which normally provides programmable backgauge positioning and bending control. Please note the programmable function of the control is currently not operating as it should. However, the machine can still be used, as the backgauge can be moved in and out using the push buttons and fine adjustment wheel, and the Y-axis (ram position) can still be manually set and adjusted for bending operations. The machine has been priced to take this into account.
