Motor Hp/Kw	2 / 1.5
Power requirements	415 V
Overall dimensions	2220 (h) mm
Weight	550 Kg
Accessories	
Coolant System	Yes
Worklight	Yes
Sale Price	\$3200+GST
Condition/Faults - If Any	Presents in near new condition. We have run the drill & all works as designed. No faults were found.
Transport insurance	We would like to extend a note to all prospective customers. We are happy to provide details of

	freight companies that transport machines anywhere in Australia or worldwide. However, we want to remind customers that the machines are not insured during transport by either the transport companies or Newmac Equipment. We strongly advise that customers speak with their usual insurance company to take out transport insurance.
3 Phase Power — Please Note	This machine may or may not include a plug. When 3 phase machinery is decommissioned from industrial use, it is typically disconnected directly from a switchboard by an electrician — meaning no plug is fitted, and in some cases the cable may also be absent. As a machinery dealer, we are not electricians and are unable to supply or fit plugs. Buyers will need to arrange connection through a licensed electrician. This is no different to purchasing new 3-phase machinery, which also requires a licensed electrician for installation.
