Weight	135 Kg.
Sale Price	\$4000+GST
Features	Water cooled with powered water chiller.
Faults - If Any	None found. In near new condition
Transport insurance	We would like to extend a note to all prospective customers. We are happy to provide details of freight companies that transport machines anywhere in Australia or worldwide. However, we want to remind customers that the machines are not insured during transport by either the transport companies or Newmac Equipment. We strongly advise that customers speak with their usual insurance company to take out transport insurance. Page one of two

3 Phase Power — Please Note	This machine may or may not include a plug. When 3 phase machinery is decommissioned from industrial use, it is typically disconnected directly from a switchboard by an electrician — meaning no plug is fitted, and in some cases the cable may also be absent. As a machinery dealer, we are not electricians and are unable to supply or fit plugs. Buyers will need to arrange connection through a licensed electrician. This is no different to purchasing new 3-phase machinery, which also requires a licensed electrician for installation.
